

Securefast Intumescent Kits for Commercial Lock Range

Securefast Intumescent Fire Door Kits for Ironmongery are essential to fire doors creating additional protection to the doors overall performance.

All door furniture must be fitted in a way which ensures the fire resisting properties of a door are not compromised.

Securefast Intumescent Fire Door kits are a quicker, easier, cleaner and accurate solution designed for usage with the Commercial Lock range.

SIN1090 - Intumescent seal for around the lock case and behind the striker for the SEU1090 Series Lock cases (including SEU1091, SEU1092, SEU1093, SEU1094, SEU1095 AND SEU1096)

Features & Benefits

- Test to EN1634-1 for use on 60mm timber fire doors
- Tested in accordance with BS EN 1363: PT 1: 1999
- Intumescent kits expand to 5 – 10 times their original size sealing the gaps around the ironmongery in the door
- Intumescent material is sodium silicate based which has been proven in many hundreds of fire tests world-wide
- Intumescent material is activated at temperature of between 100 - 150°C
- Intumescent kits have a self-adhesive backing easy to apply with a strong adhesion
