

SmartLock MIFARE™ Indoor Wireless Hotel System

The SmartLock indoor wireless hotel system range, is a networked system offering all the advantages of the virtual network system with the added benefit of wireless networking.

The system is designed to minimise the furniture on the door creating clean lines with a less obtrusive lock.

The RFID technology offers an easy to use and secure access solution ideal for medium to large installations.

The system includes; a battery powered door mounted lock, a mains powered controller (to control the electric locking mechanisms) lifts, barriers and management software.

CE approved.

Features & Benefits

- Euro Profile Lock case has 65mm backset with 72mm crs
- Centralised card programming using easy to use Windows based software
- Real time card cancellation and logging
- Fault and battery condition reporting
- Up to 64 locks / doors can be controlled by each base station
- Up to 10,000+ user cards per system
- Each card can be programmed with access to doors, groups and areas with time and date validity and shift control
- Hubs use either Ethernet or USB to communicate around the building with a wireless link to the locks
- Door controllers for electric locking can control 2 doors with the same authorities or read in/read out
- ISO printable or pre-printed cards, tokens ,etc.
- Cards can be used for multiple sites and multiple applications
- Can be set up remotely or on site
- Web browser version available
- Interfaces with leading brand PMS systems

Ideal for:-

Medium to large systems such as; hotels, universities, colleges, schools, offices, hospitals and residential accommodation.
