

GU BKS Multi-point Locks

The GU Multi Point Lock presents a new concept for modern house entrance doors: GU Secury Automatic access controlled.

The unique combination of lock, data transmission and door control with fingerprints or keypads, the system sets a new standard for increased security and convenience in house entrance doors.

The identical installation dimensions, selectable finger scan or keypad operating elements, the small number of system components and the use of pre-assembled system cables significantly increase productivity and manufacturer friendliness. No compromises are made concerning security and convenience.

Features & Benefits- Multi Point Lock

- Door automatically locks when closed
- Lever/ Key operation internally
- Key operation externally
- Universal handing
- Integrated trigger built into latch bolts to activate 20mm bolt projection
- Latches deadlocked against manipulation when projected
