

Rim Night Latches

Securefast rim night latches are used in conjunction with a rim cylinder and offer protection using the deadlocking function of the inside turn.

Rim night latches are ideal for use on a front door, these locks come with a latch which can be opened with the key then at night if the snib is pushed up the latch is locked in position and cannot be unlocked with the key. The Snib can also be used to lock the night latch in the open position.

Features & Benefits

- The rim night latch is available in two sizes, standard with a 60mm backset and narrow style with a 40mm backset.
- Hold back snib
- Deadlocking function of inside turn by rim cylinder from the outside
- Available in polished brass, polished chrome and powder coated finishes.
- All night latches are supplied with a matching rim mounted strike
- Supplied complete with rim cylinder and two keys.
