

Intumescent for Mechanical Digital Locks

Securefast Intumescent Fire Door Kits for Ironmongery are essential to fire doors creating additional protection to the doors overall performance.

All door furniture must be fitted in a way which ensures the fire resisting properties of a door are not compromised.

Securefast Intumescent Fire Door Seals are supplied around the tubular latch for a quicker, easier, cleaner and accurate solution on Securefast Mechanical Digital Locks. To complete the package seals are provided for behind the striker.

Features & Benefits

- The digital lock range have been certified for use on 30 min and 60 min timber fire doors to EN1634-1
- The seal has been tested in accordance with BS EN 1363: PT 1: 1999
- Intumescent kits expand to 5 – 10 times their original size sealing the gaps around the ironmongery and the door
- Intumescent material is sodium silicate based which has been proven in many hundreds of fire tests world-wide
- Intumescent material is activated at temperature of between 100 - 150°C
- Intumescent kits have a self-adhesive backing easy to apply with a strong adhesion
