

ASL1800 Cyber Digital Locker Lock

The ASL1800 Cyber Digital Locker Lock is a quick retrofit for keyed cam locks on a wide range of lockers, cabinets and cupboards.

The keyless locks are easy to fit, taking just a few minutes to remove the existing cam lock and then making an additional top fixing for the new lock.

Functions:

Private Function

This is the most common function and used where the same code will be repeatedly used e.g. a pupil in a school or an employee with the same locker in the work place.

Public Function

The locker lock operates with a single user code. The guest enters a personal code with a 4~9 digit to lock the lock. The same code is entered to open the lock before being erased and ready for the next user. This function is used for short term, multi occupancy applications e.g. a locker in a gym or public changing rooms

All three cams are supplied as standard		
Hook	Cranked	Straight
		
Max size from outside locker, to inside cam		
20mm	27mm Inverse 12mm	20mm

Code	Description
ASL1800	Cyber Locker Lock

ASL1800 Cyber Digital Locker Lock

Features & Benefits
