

### SSL961 Hotel Energy Saving Switch

***This modern design, hotel energy saving switch is easy to operate and can function with different cards. The unit also has a 'stand by' light, which is used to locate the unit when you enter a darkened room.***

The energy saving switch can be used in hotel room's to control sockets and appliances, including the lighting.

#### Features & Benefits

- Up to 20-30% total energy saving
- LED indication and PC isolation material
- Ensures all of the devices shut off after the card is withdrawn
- Suitable for working with construction automation systems, energy management systems and lighting control systems
- Uses the same card, for both; opening the door and supplying power
- This product is designed and produced in accordance with CE regulations
- Blue 'stand by' light to ensure the unit can be located, even in the dark
- Ivory finish; also available in grey, silver and black to special order.

#### Product Operation

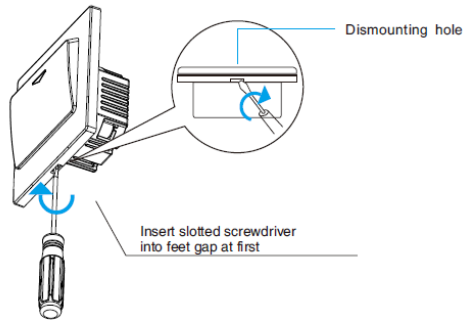

Insert a relevant card into the switch, then all appliances will immediately gain power. When the card is withdrawn from the switch, there will be a 10-30 second delay before all power in the room is shut off.
