

Optimus Door Entry

Optimus is a range of GSM intercoms designed to work with gates, barriers and door entrances. Utilising the GSM network we are able to greatly reduce any cabling between the entrance and the property. Calls are received on standard telephones or mobile phones.

A SIM card comes pre-installed, all that is then required is the numbers relating to the call buttons to be programmed. Your home or mobile phone number is added to the auto-dial memory, just like adding a number to your own mobile. When a visitor presses the number of your property on the intercom, a call is made to your phone. When you answer the call you can speak to your visitor and let them in by pressing '#'.

Features & Benefits

- 3 Telephone Numbers per Call Button
- 3 Default PIN Codes
- 300 Authorised Incoming Numbers
- 2 Aux Inputs
- 12V, 1A dc PSU
