

DoorSense

DoorSense from UNION is an easy way to hold fire doors open but remains effective, so that it releases the door on the sound of the fire alarm.

Battery operated and a standalone unit, the DoorSense unit which can be fixed to a fire door in seconds to provide a reliable way to keep it open, but will automatically release if the fire alarm sounds.

Easy to install, the DoorSense needs, no wiring or special skills. Just use the template provided and can even use the same footprint as other units.

Once installed you can have DoorSense working manually - using the foot release or by pushing the door away from the frame - or automatically using the pre-set night release timer.

Features & Benefits

- Acoustic release door hold open device

Code	Description
AUN-8755-A	DoorSense Acoustic Door Hold Open Unit (Black)

DoorSense

Safe

- Unlike a door wedge, DoorSense releases an open door when the fire alarm sounds, allowing it to be closed
- CE Marked to EN 1155 and fire rated (FD120) for use on timber doors to give installers and end users peace of mind

Simple

- Easy to install – No wiring or specialist skills needed. Simple clear instructions with a template provided. Watch a guide at www.uniononline.co.uk/doorsense
- Low Maintenance costs – Powered by two C-type batteries (included) with charge indicator for peace of mind
- Can be released manually, by sound or with the built-in timer at a pre set time

Versatile

- Ideal for any large or small applications where fire doors are installed including care homes, schools, public buildings, etc.
- Available in black, red or white
- Retro fits the footprint of existing products
- Designed to stay working longer, with a robust, rounded casing deflecting impacts

All dimensions are in millimetres
