

SBL365 Mechanical Digital Locks with a Mortice Lock Case

SBL365.SLFR/94

The unit includes a “Passage Mode” on the inside which is activated once a correct code is entered by turning a small turn. This allows the latch bolt to be engaged in the striker, but is withdrawn by either lever handle until the passage mode is released. Ideal for allowing a non-authorized person to come and go through the door when the door does not need to be secure.

The SBL365 range of mechanical digital locks with lock case are available with an Escape Sash Lock allowing safe egress from the inside with one action every time, a Mortice Night Latch with an anti thrust increasing security of the latch bolt by preventing it from being forced back and a Mortice Sash Lock offering a separate deadbolt which is secured by the key and not controlled by the mechanical digital lock.

The SBL365 range of fire rated mechanical digital locks has been tested to EN1634-1 for use on 30 min. and 60 min. fire doors. Intumescent fitted to the lock is essential for use in fire doors creating additional protection to the door’s overall performance.

The Securefast intumescent seal SIN1090 is supplied with the fire rated package for easier and accurate solution. To complete the package seals are provided for behind the striker.

Features & Benefits

- The intumescent has been tested in accordance with BS EN 1363: PT 1: 1999 and expands to 5 to 10 times their original size sealing the gaps around the lock case
- 2037 Non-sequential code combinations
- These fire rated units have “Easy Code” change
- The package is supplied complete with Digital Lock, Mortice Sash Lock or Night Latch with anti-thrust, Escape Sash Lock, Cylinder, Security Escutcheon to suit and Intumescent for the lock case
- The SBL365 mechanical digital lock range has been certified to EN1634-1 for use on 30 min. and 60 min. timber fire doors by Exova Warrington

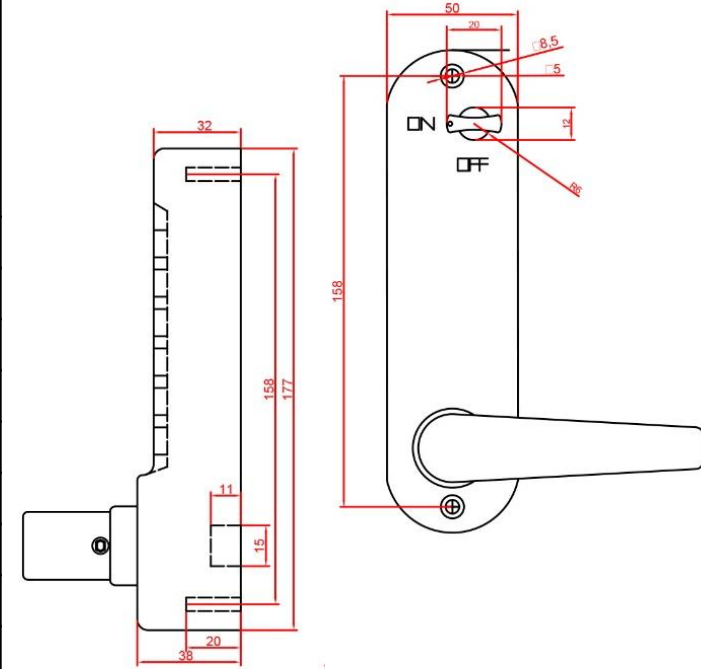

Mechanical digital locks are used extensively in hospitals, schools, universities etc. on fire doors, therefore it is important that the integrity of the door is not compromised by failing to include the intumescent seals. – Intumescent sold separately (Product Code SIN1090).

Fire-rated mechanical digital locks are supplied complete with intumescent attached ready for installation.
